BUILDING LENDER CASH ASSETS BY SERVICING BORROWER NEEDS

The following protocol is designed to allow LENDERS:

1) To provide loans to borrowers equal to cash deposited with them or with institutions they designate.

2) To immediately receive, for each loan made, an equal value amount of earned income that can be placed on the books as a cash asset.

3) To provide themselves and borrowers safety through self-liquidation of loans.

4) ***To increase the number of borrowers and the positive impact of a LENDER in a community by enabling borrowers with as little as $10,000 USD in available funds to engage this protocol.***

To engage in this protocol a LENDER would negotiate with a law firm ("LAW FIRM") affiliated with The Nelson Law Group to provide future services ("SERVICES") to the LAW FIRM.

For each borrower serviced through this protocol the LAW FIRM would open an "IOLTA" account with an institution agreed to with a LENDER.

A borrower might deposit $10,000 USD ("DEPOSIT") or more in the IOLTA account designated by the LAW FIRM to service that borrower.

Or, a borrower might make the DEPOSIT in a borrower's account with the same institution as the IOLTA account.

Or, a borrower might arrange for a DEPOSIT to be made on the borrower's behalf by or through the LAW FIRM.

The party providing the DEPOSIT is henceforth referred to as "DEPOSITOR".

A borrower would contract privately ("CONTRACT") with the LAW FIRM to use the DEPOSIT as part of the collateral for the LENDER to make a loan.

As per CONTRACT, the LAW FIRM would issue, or arrange the issuing of, a Promissory Note ("NOTE") to be used as complimentary collateral for the LENDER to make a loan:

1) With a NOTE face amount equal to 240% or more of the loan amount – NOTE amount would be selected after negotiating the total loan amount to be accrued through repetitive transactions.

2) Payable at the end of ten years.

3) ***Guaranteed payable by "Legal Worth" in the form of pre-sold ADVERTISING values.***

Collateralized by the DEPOSIT and the NOTE, the LAW FIRM would arrange for the LENDER to loan to the borrower an amount equal to the DEPOSIT plus LENDER cash assets previously accrued:

1) Principal amount to be repaid at the end of ten years.

2) With interest paid annually in arrears.

The borrower would use the committed loan to engage in private business as per CONTRACT:

1) Whereby loan funds would become LAW FIRM earned income deposited in the IOLTA account.

2) The LAW FIRM would use IOLTA funds equal to the loan amount to acquire a Certificate of Deposit of equal face amount, annually renewable for ten years.

The LAW FIRM would irrevocably assign the Certificate of Deposit to the LENDER as pre-payment for SERVICES, which immediately would be earned income and a cash asset for the LENDER.

Once the Certificate of Deposit has been accepted by the LENDER as pre-payment for SERVICES and is held by the LENDER as a cash asset, as per that agreement the LENDER would:

1) Release the DEPOSIT as collateral for the loan.

2) Retain the NOTE as collateral for both principal and interest of the loan.

3) Repeat the process until such time as the total amount loaned to the borrower:

   A) Is equal to the legal or policy loan limit of the LENDER.

   B) And, an amount equal to the loan amount has been accrued by the LENDER as cash assets.

The following chart, assuming the differential between loan annual interest and Certificate of Deposit annual interest is 2%, illustrates the above described protocol.

Using the chart for illustration, the legal or policy loan limit of a LENDER should be the "stopping point" for each borrower.

Although Promissory Note assets for this value and more could be available, as one LENDER wouldn't be expected to lend this amount, for illustration only the chart extends to $2.6 Trillion USD:

A LENDER might engage this process as a means of resolving an asset imbalance for the LENDER:

1) In using the chart, a LENDER could determine the amount of cash that the LENDER needs to have and, if less than the LENDER'S loan limit, select that amount as the "stopping point".

2) In the event the cash needed by a LENDER is greater than the LENDER'S loan limit per borrower, the LAW FIRM might provide the LENDER as many borrowers as necessary.

USING CASH ASSETS ACCRUED AS PER SERVICES CONTRACT

As per the SERVICES contract, at end of term the LENDER will use principal amounts of Certificates of Deposits to pay loan amounts outstanding, retaining balance as earned income.

To pre-pay loan and accrue profits, as per SERVICES contract, LENDER would use cash assets accrued to engage in non-depletion and riskless transactions presented by the LAW FIRM:

1) ***Buying gold that has been pre-sold for a profit.***

2) ***Issuing and/or acquiring REVENUE SHARING OBLIGATION Series A BONDS backed by gold.***

3) Buying other products, commodities, or properties that have been pre-sold for a profit.

4) Buying financial instruments that have been pre-sold for a profit.

5) Contracting with Hedge Funds whereby principal may be insured and profits are expected to be substantial.

6) ***<u>Supporting Bank Commitment Letters or Guarantees involved in funding Purchase Orders as per BUSINESS CANNONS protocols.</u>***

7) Supporting escrow requirements for property acquisitions.

8) Engaging in specialized transactions supported by trade credit insurance or other insurance vehicles.

9) ***<u>Depositing accrued earned income (as a new DEPOSITOR!) into IOLTA accounts or in institutions that can provide larger loan amounts per borrower.</u>***

10) Etc.

As per the SERVICES contract, profits from transactions undertaken would be distributed:

1) ***<u>10% of profits would be retained as earned income by the LENDER.</u>***

2) Until lien on NOTE is satisfied, 40% of profits would be retained by LENDER as payment

   A) Of interest differential between loan interest and Certificate of Deposit interest.

   B) Of loan principal amount.

   C) After lien on NOTE is satisfied, this 40% of additional profits would be retained as earned income by the LENDER.

3) ***<u>50% of profits would be provided to LAW FIRM to be used:</u>***

   A) 10% deposited into a LAW FIRM account to be held as a “Prepaid Legal Fund” to service needs approved by the BUSINESS CANNONS Business Group Administration.

   B) 40% of profits to pay for UNIFORM ADVERTISING WEEK Services Purchase Orders as per CONTRACT:

      a) As per other protocols, 25% of these funds would be used to immediately pay Promissory Notes designated by LAW FIRM and/or by Business Group Administration:

         Through CONTRACT, the borrower and/or the DEPOSITOR might designate Promissory Notes, held in escrow by Administration for collection.

b) As per other protocols, 50% of these funds would be deposited into a common fund used to generate profits to pay Promissory Notes designated by LAW FIRM &/or by Administration.

c) As per CONTRACT, borrower may decide, with approval by Administration, which entities are to receive the "UNIFORMS", with the borrower controlling advertising therewith:

1. The entity selected would receive $500 per week income per "UNIFORM" assigned:

2. A "UNIFORM" might really be a uniform, or a laptop computer, or a desk, or a vehicle, etc.; i.e., anything that could display logos and websites somewhere.

3. A person associated with the entity would receive $500 per week income for using the "UNIFORM" while performing tasks assigned by the entity.

4. To provide greater pay, multiple "UNIFORMS" could be assigned to a person associated with the company.

5. Providing UNIFORM ADVERTISING WEEK Services by allowing persons associated with the entity to use them while performing assigned tasks:

   A. An entity can build a business by providing work task opportunities, collecting "UNIFORM" income and providing income to a person doing the work.

   B. An entity can provide jobs that can be very productive long-term without their having to be income producing immediately.

Thus, the stated purpose for a loan to be made to a borrower would be for the borrower to pay for advertising services.

With each Purchase Order there is an "AVAL FEE" that is paid to parties selected by a LAW FIRM and approved by a CENTER.

Thus, each use of a DEPOSIT in the process could result in an earned "AVAL FEE" being subsequently paid to a DEPOSITOR – which might be the borrower or another party.

INFORMATION PROVIDED HEREIN IS FOR EDUCATIONAL PURPOSES ONLY AND SHOULD NOT BE CONSIDERED AS POLICY FOR ANY LENDER OR BORROWER.

ANYONE INTENDING TO ENGAGE IN THIS PROCESS SHOULD FIRST CONSULT WITH LEGAL AND BUSINESS ADVISORS.

THE BUSINESS GROUP OFFERS THIS INFORMATION ONLY TO ILLUSTRATE STRUCTURES THAT MIGHT BE HELPFUL TO BUSINESSES WISHING TO INCREASE INCOME THROUGH ADVERTISING AND LENDERS WILLING TO SUPPORT THEM.

THIS IS NOT A SOLICITATION FOR BUSINESS.
